SUMMARY

Results-driven Full Stack Engineer with a proven track record of enhancing user experience and driving business growth. Skilled in frontend and backend technologies, agile methodologies, and project management. Demonstrates adaptability in creating tailored solutions across industries. Committed to collaboration, efficient teamwork, and delivering results that exceed expectations.

EXPERIENCE

HMP Metrics | *Full Stack Engineer*

March 2021 – Present

- Streamlined user experience by integrating full stack authentication using AWS Cognito, React.js, and Express.js, enhancing security and trust within distributed systems.
- Boosted user retention, engagement, and renewals by deploying automated email campaigns via AWS SES and Node.js resulting in a 70% increase in subscription renewals.
- Expanded company's digital presence by developing and maintaining 20+ marketing and lead generation websites using HTML, CSS, and JavaScript.
- Improved IT efficiency and support for 150+ employees through installation, deployment, and management of hardware and software.
- Developed a customizable ticketing system using React (frontend) and Express (backend), accommodating various facility technology footprints, allowing 400+ users to submit tickets and reducing resolution time by 80%.

General Assembly | *Software Engineering Fellow*

May 2020 – August 2020

- Acquired practical experience and subject matter expertise by completing an accelerated program, creating four full stack applications using cutting-edge technologies and best practices, including Javascript, Node.js, React, REST APIs, Non-Relational and Relational and various other frameworks for building systems.
- Fostered a collaborative work environment by utilizing Git and Github for efficient version control and team coordination.
- Accelerated project delivery through Agile methodologies within a SCRUM environment, focusing on customer-facing web application development.

Reno Exclusive Assets LLC | *Partner*

January 2019 – April 2021

- Optimized sales performance by devising a tailored process workflow and sales funnel, driving business growth in alignment with specific KPIs.
- Increased operational efficiency by recruiting, training, and managing virtual assistants to seamlessly integrate within company processes.

Strategic Capital Enterprises | *Project Manager*

February 2014 – February 2017

- Effectively managed project resources by overseeing budgeting, planning, and execution of real estate projects, working closely with business stakeholders.
- Ensured timely project completion and minimized delays by coordinating permitting, project phases, materials, financing, and payroll.

CURRENT PROJECTS

Leads Genie | *A custom full stack, responsive lead generation app, boosting client acquisition and revenue for a real estate brokerage*

- Technologies: React, Node.js, MongoDB, Express.js, REST Framework
- Integrations: BridgeAPI (MLS), AWS, Stripe API, Flowcode API
- Collaborated closely with the client to build and manage the entire project, ensuring alignment with their business goals within a SCRUM environment, focusing on software engineering and architecture.

Quizbee | *Engaging production app empowering recruiters to effectively connect with, qualify, and track high-potential candidates at high schools*

- Technologies: React, Node.js, MariaDB, Amazon Web Services
- Features: Custom web sockets for real-time leaderboard, Magic Link and Social Logins (OAuth) for seamless authentication, and NoSQL database management

CareerFinesse | *Platform offering user authentication, e-commerce, workflow management, and automation, enabling users to achieve their career goals*

- Technologies: React.js, Node.js, MariaDB, Stripe API, Amazon Web Services, Monday.com API, Microsoft Graph API
- Features: Robust workflow automations powered by Stripe webhooks, Monday.com API, AWS SES, and Microsoft Graph API, elevating user experience and satisfaction, and utilizing MariaDB for database management

SKILLS

- Frontend: HTML, CSS / Sass, JavaScript, React.js, Bootstrap, jQuery, Material UI
- Backend: MongoDB, PostgreSQL, MariaDB, Node.js, Express.js
- Other: Amazon Web Services (AWS), Microsoft 365, Microsoft Graph API, Stripe API, OAuth Authentication

EDUCATION

Georgia State University, Robinson College of Business | *Bachelor of Business Administration, Finance concentration*
